It is part of the European Union's action plan for financing of sustainable growth and a greener Europe. This plan aims to:

ESG: the acronym ESG, Environmental, Social and Governance, is commonly used by the international financial community to designate these three areas that constitute the three pillars of a company's non-financial analysis.

The environmental criterion takes into account factors such as waste management, reduction of greenhouse gas emissions and prevention of environmental risks.

Mis en forme : Anglais (Royaume-Uni)

The social criterion takes into account accident prevention, training, respect for employee rights, industrial relations, etc.

The governance criterion verifies, among other things, the independence of the Board of Directors or diversity within the company.

▪ Exclusion policy

Indosuez Wealth Management has defined an exclusion policy in line with the commitments made by Crédit Agricole Group, covering exclusions by issuer and sectoral exclusions. These exclusions are designed to avoid extreme sustainability risks and therefore limit the likely negative impact of sustainability risk on the performance of funds and mandates.

Companies that do not comply with Indosuez Wealth Management Group's ESG policy, international conventions and internationally recognised frameworks, or international regulatory frameworks are excluded. In particular, Indosuez Wealth Management Group implements targeted sector exclusions specific to the coal and tobacco industries.

For investments in assets listed in portfolios managed or advised by Indosuez Wealth Management, ESG ratings and their breakdown into E, S and G criteria are made available to managers or advisors in the various systems used. Thus, they can manage sustainability risk at the issuer and portfolio level.

For investments in actively managed external funds of listed assets (i.e. excluding index funds or ETFs) or funds whose management it delegates to external managers, Indosuez Wealth Management Group includes an analysis in its due diligence on the manager in order to assess the ESG policy implemented and its compliance with the Group's principles.

The Private Markets investment process also incorporates the ESG dimension through due diligence on external managers and assessment of their ESG process. This analysis is performed for primary investments and co-investments. Secondary investments do not currently allow this analysis to be deployed.
